FRUITS (NONCITRUS): MARKETING SEASONS FOR SPECIFIED CROPS

Apples: All South Atlantic States, Kentucky, Tennessee, Indiana, Illinois, Missouri, Arkansas, New Mexico, and California, June 1 to May 31; all other States, July 1 to June 30, except Washington and Oregon where the bulk of the crop is marketed August 1 to July 31.

Apricots: Fresh fruit -- May 25 to August 20.  
Canning -- June 15 to August 15.  
Dried -- California, June 20 to August 20.

Avocados: California -- November 1 to November 30 (following year).  
Florida -- June 20 to Feb 28.

Bananas: January 1 to December 31.

Blueberries: May 20 to September 30.

Berries, Misc.: Oregon and Washington, May 1 to November 30.

Cherries: Fresh fruit -- Sweet varieties, May 1 to August 15;  
Tart varieties, June 15 to August 20.

Cranberries: September 5 to December 20.

Dates: August 15 to March 15.

Figs: Fresh fruit -- June 5 to October 15.  
Canning -- August 1 to October 15.  
Dried -- California, June 20 to October 31.

Grapes: Fresh fruit -- California, May 25 to April 30;  
Arizona, June 5 to July 15;  
All other States, July 10 to October 31.  
Crushed for juice, wine and brandy -- August 1 to December 15.  
Dried for raisins -- California, September 1 to May 30.

Nectarines: June 10 to August 31.

Olives: September 25 to March 15.

Papayas: January 1 to December 31. (Peak harvest May 15 to July 15 and September 15 to December 15).

FRUITS (NONCITRUS): MARKETING SEASONS FOR SPECIFIED CROPS--CONTINUED

Peaches:                    Fresh fruit -- Georgia and South Carolina, May 20 to August 31; Other South Atlantic States, South Central States, and California, June 1 to September 30; New England States, New York, Michigan, and Idaho, August 1 to September 30; all other States, July 1 to September 30.

Canning -- California, July 1 to September 10.

Dried -- California, August 1 to October 10.

Pears:                     Fresh fruit -- California, July 1 to April 30; Washington and Oregon, August 10 to May 31; Other States, July 1 to December 15.

Canning and dried -- California, Washington and Oregon, August 1 to November 30.

Pineapples:                January 1 to December 31. (Peak harvest March 1 to July 31).

Pomegranates:             September 15 to November 10.

Plums:                     Fresh fruit -- California, May 25 to September 30.

Canning -- California, June 1 to September 30.

Prunes:                    Dried -- California, August 1 to April 31.

Prunes and Plums:         Fresh fruit and canning -- Idaho, Michigan, Oregon and Washington, August 10 to October 20.

TREE NUTS

Almonds:                   August 5 to November 15.

Filberts:                   October 1 to September 30.

Macadamia Nuts:          January 1 to December 31 (Peak harvest August 1 to December 31).

Pecans:                    September 30 to March 15.

Pistachios:                September 1 to October 31.

Walnuts:                   September 15 to December 30.

## DEFINITIONS OF TERMS

Total Production - is the quantity actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested because of economic reasons.

Utilized Production - is the amount sold plus the quantities used at home or held in storage.

Economic Abandonment - is the difference between total and utilized production which is mature fruit not harvested for economic reasons or excess cullage fruit.

Utilization - refers to first utilization, not necessarily final utilization. For example, frozen fruit included some fruit that may be later used for making preserves. Grade-outs for fresh market fruit which are processed are included in the processing quantity. Fruit graded-out from canning or freezing and utilized for juice is included with juice.

Apples, Commercial Crop - orchards of 100 or more bearing age trees.

Prices - is a season average for all methods of sale. For a crop sold for both fresh market and processing, the season average price is a weighted average of the fresh and processing price.

Prices for fresh fruit, except as noted below, are the average prices producers receive at the point of first sale. This is commonly referred to as the average price as sold. Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the fruit is sold f.o.b. packed by growers, part is sold as bulk fruit at the packinghouse door, and some is sold retail at roadside stands, the fresh fruit average price as sold is a weighted average of the average price for each method of sale.

Prices for fruit sold for processing are equivalent returns for fruit delivered to the processing plant door.

Exceptions to the above definitions are:

(1) Fresh fruit sales in Washington and Oregon are equivalent returns at packinghouse door. The equivalent packinghouse returns represent adjusted prices. F.o.b. packed prices are adjusted down to an equivalent incoming packinghouse door price by subtracting all costs that accumulate between the incoming packinghouse door and the f.o.b. price. These costs include grading, packing, inspecting fees, selling, and other costs.

(2) Fresh prices shown for California represent returns at the first delivery point by the producer. The first delivery point price is defined as the price received by growers for fruit delivered at the local market, packinghouse, receiving shed, or any other first delivery point.

Value estimates in this report cover the marketing season or crop year or years and should not be confused with cash receipts from these crops for a single calendar year. The season average price for each State is applied to utilized production to compute value of production. The average price shown for the United States is obtained by dividing the U.S. value of production by the quantity utilized.
